***Note** The **Saf-Cap™ I CR Dropper Closure** uses the same patented design as the standard Saf-Cap™ I closure but has been modified to accept a bulb/pipette assembly by the customer. VBC has had packages utilizing various sized, styled and composition bottles with Saf-Cap™ Child-Resistant closures tested by outside agencies. Results of these protocol tests for specific sized closures are available upon request. Composition and design of the bulb/pipette may affect the outcome of such tests
